# GUITAR SETUP

## 6, 7, 8 String Electric Guitar

### When Does Your Guitar Need This?

---

A guitar setup should be done on every “new guitar” and older guitars at least once a year. If you have playability issues, fret buzz, tuning problems, etc. your guitar probably needs a professional setup.

### What Does This Do for My Guitar?

---

A professional guitar setup effectively balances the numerous settings between the parts of your guitar. This **enables proper tone and resolves playability problems** such as fret buzz, incorrect intonation, string action, pickup heights, etc. Inspecting and cleaning keeps your bass looking great and can uncover hidden or potential problems.

### What Does a Setup Include?

---

There is a specific process which requires many guitar technician tools to complete a proper guitar setup. Inspection of certain parts may, or may not, mandate adjustments to the specific part. **Our setup includes:**

- 🎸 Set neck relief (adjust truss rod), nut slots
- 🎸 Set string action and pickup heights
- 🎸 Install new guitar strings
- 🎸 Digitally tune and calibrate intonation
- 🎸 Polish frets & condition (dark wood) fretboard
- 🎸 Clean and polish body, neck

### What Does a Guitar Setup Cost?

---

**Our standard Guitar Setup is only \$90** + strings. There is a variable add-on fee for Floyd Rose and EverTune equipped guitars.

### Schedule an Appointment
