BASS SETUP

4/5-String Bass Guitar

When Does Your Bass Need This?

A bass setup should be done on every “new bass” and older bass guitars **approximately 1-2 times per year**. If you notice that the sound of your bass sounds odd it probably needs technical adjustments to be made,

What Does This Do for My Bass?

A professional bass setup effectively balances the numerous settings between the parts of your bass. This **enables proper tone and resolves playability problems** such as incorrect intonation, fret buzz, fret out, rough fret ends, incorrect string height and pickup height. Inspecting and cleaning keeps your bass looking great and can uncover hidden or potential problems.

What Things Does This Include?

There is a specific process which requires many guitar technician tools to complete a proper bass setup. Inspection of certain parts may, or may not, mandate adjustments to the specific part. **Our setup includes:**

- 🎸 Check neck relief / truss rod
- 🎸 Check string and pickup heights
- 🎸 Install new bass guitar strings / tune strings
- 🎸 Check and calibrate intonation
- 🎸 Polish frets & oil condition fretboard
- 🎸 Clean and polish body, neck and head

What Is the Price for This Service?

Our standard Bass Guitar Setup is only \$55 + the cost of your choice of bass guitar strings. **If you choose string sizes that require string nut modification add \$30.*

How Do We Get Started?

Simply get in touch with us to arrange a time to meet. We offer door-to-door pickup and delivery service for a very nominal cost, or we have a drop-off & pick-up office on Cherokee Street in Kennesaw, Georgia.

For a fast response text us 24/7 at 770-654-3223 – Thanks!
